COMMUNITY NEEDS SURVEY

*Survey of people 65 and older in Augusta County, Rockingham County, and Harrisonburg*

Would you be willing to take 10 – 15 minutes today to fill out a survey? This is part of a comprehensive study of the most pressing needs of people 65 and older in Augusta County, Rockingham County, and Harrisonburg.

They need more than 2000 people to complete the survey for the results to be valid, and they want to hear from a wide range of people. Your opinions are valuable, and your participation will help make the survey a success.

The results of the survey will help local governments, agencies, non-profits, health care providers, and businesses understand what our community needs most to support a high quality of life for people over 65.

The survey is being sponsored by Bridgewater Retirement Community and the Valley Program for Aging Services as part of their ongoing commitment to the community.

We won't provide your name as part of the survey, and all your responses will be kept strictly confidential. They will go directly to the independent company conducting the research, Holleran Consultants. No one at VPAS or Bridgewater will see your individual responses. Some specific quotations may be included in the final report, but no one's identity will be provided.

We think this is an important project and are willing to take some time to help people complete the survey. Is it okay if we do it now?
