

Addendum # 1

RFQ # 71010-18-08

Mill Place Walking Bridge and Picnic Shelter

**1. Retaining Wall** - fill dirt must be transported, placed, and compacted to establish a maximum 1:12 slope tying in with existing paved path on both sides of the Walking Bridge.

- This should establish a "ramp" from the top of the retaining wall to the edge of the asphalt approximately 10' wide such that a **separate contractor** can complete laying the base and asphalt to connect with the bridge.

**2. Walking Bridge**- the fastening method for 4" x 6" decking to be communicated at a later date (prior to quote due date).

**3. Due Date**- Quotes will be due Monday, June 4<sup>th</sup> at 2:00 P.M.
